

Overshadowed by election coverage and excitement over vaccine breakthroughs, the postponed IPO of China's Ant Group was news investors could be grappling with for some time. Ant, a spinoff of e-commerce giant **Alibaba**, in a challenge to state domination of China's banking system, rose to prominence by making digital payments, loans, insurance, and investments accessible to hundreds of millions of Chinese via their smart phones. Ant's IPO, which had been forecast to be the world's biggest ever, was called off just days before the planned listing, following the Chinese government's publication of prospective online lending guidelines that could require Ant to hold substantially more capital. Disturbingly, it was unclear whether the move reflected regulators' prudential concerns about the stability of the financial system and levels of consumer debt, or if it was designed to put outspoken Alibaba founder Jack Ma in his place. The listing delay caused Alibaba's share price to drop 8%, nearly the entire value of its 33% Ant stake.

While the Chinese market has been rising, many have become complacent about its political risks. Disruptive businesses like Alibaba and Ant are capitalizing on market opportunities previously overlooked by incumbents and thus by regulators. However, in a system like China's—where policies can shift on a dime—their position is never entirely secure. That said, Alibaba's most recent earnings report showed its core e-commerce business and explosively growing cloud-computing segment remain exceptionally strong.

BENCHMARK PERFORMANCE BY SECTOR – NOVEMBER

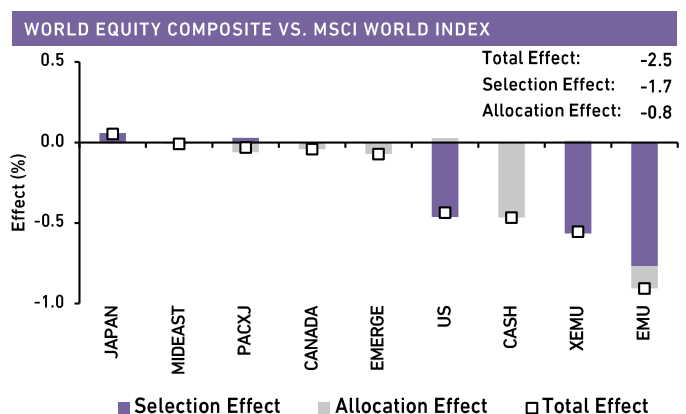

- Energy and Financials (banking stocks in particular) were the best-performing sectors as the market looked ahead to a speedy resumption of normal travel and spending patterns.
- Utilities lagged as the market rotated to more cyclically exposed stocks.

BENCHMARK PERFORMANCE BY GEOGRAPHY – NOVEMBER

- With the exception (barely) of the Middle East, all regions posted positive double-digit returns, as clinical trial results for COVID-19 vaccines suggested that a semblance of normalcy could be reached by mid-2021.
- The eurozone led as its COVID-19 cases appeared to peak after lockdowns were imposed.

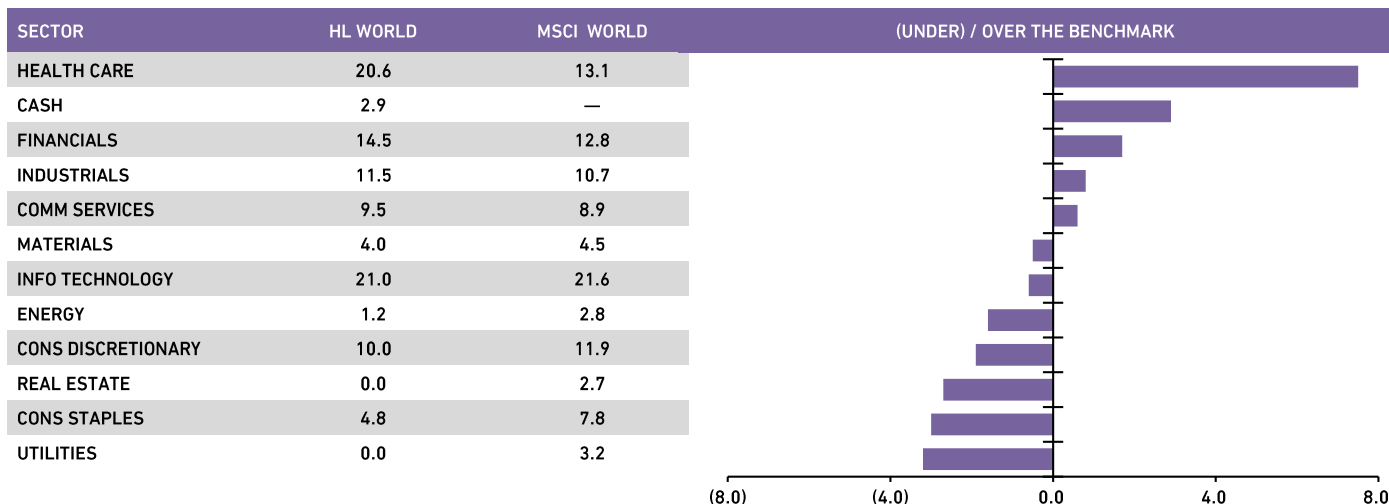

PERFORMANCE ATTRIBUTION BY SECTOR – NOVEMBER

- Our underweight in defensive Consumer Staples helped, as did good stock selection. Our cosmetics holdings (**Shiseido**, **Estee Lauder**, **L'Oréal**) were among the strongest within the sector.
- Our Financials stocks lagged as **First Republic Bank**, a high-quality US bank, was hurt by the market rotation toward cheaper stocks in the sector on the vaccine good news.

PERFORMANCE ATTRIBUTION BY GEOGRAPHY – NOVEMBER

- Stock selection was weak in the eurozone. **Symrise**, a German supplier of flavors and fragrances, trailed its more cyclically exposed regional counterparts.
- Stock selection also dragged on relative returns in the US, where shares of **Facebook** and **Alphabet** wavered in the face of mounting anti-trust scrutiny.
